EDUCATION

VIT Bhopal University **Sep. 2023 – May 2027**
Bachelor of Technology (B.Tech) in Computer Science and Engineering | CGPA: 8.54/10 *Bhopal, India*

Dr. Virendra Swarup Education Centre **2021 – 2023**
ISC (Class XII): 89.6% (2023) | ICSE (Class X): 87.67% (2021) *Kanpur, India*

TECHNICAL SKILLS

Languages: Java, JavaScript, TypeScript, Python, SQL, HTML, CSS
Frameworks & Technologies: Spring Boot, React.js, Node.js, Express.js, Socket.IO, BullMQ, Tailwind CSS
Databases: PostgreSQL (PostGIS), MongoDB, Redis
Cloud & Tools: AWS (EC2, S3, IAM), Docker, Git, GitHub Actions, Postman, Playwright, Linux
CS Fundamentals: Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks

EXPERIENCE

GeekyAnts Jun. 2026 – Aug. 2026
Software Engineer Intern *Remote*

- Built real-time messaging with Socket.IO and React, implementing optimistic UI updates and message reconciliation to handle connection drops and failed deliveries.
- Developed backend credit ledger APIs in Node.js and PostgreSQL, using row-level locking and transactions to prevent race conditions during checkout.
- Implemented product search with multi-parameter filtering and URL-synced state; wrote Jest unit tests covering ledger balance calculations and CSV exports.

PROJECTS

TaskGenie – Service Discovery and Booking Platform Nov. 2025
React.js, Node.js, PostgreSQL, Redis, Docker, AWS Live Demo | GitHub

- Engineered booking APIs using PostgreSQL transaction locks and overlap constraints; prevented double bookings during local load tests with 200 concurrent requests.
- Optimized location-based provider search with PostGIS spatial indexes and caching, using Redis invalidation to refresh results after provider updates.
- Secured Razorpay payments with HMAC-SHA256 signature verification and duplicate-payment checks; implemented reconciliation and refund tracking to recover from missed callbacks.
- Built real-time booking chat with Socket.IO and PostgreSQL, adding participant authorization, message deduplication, and reconnect recovery so users can retrieve missed messages.

Udaan – Scholarship Intelligence Platform Jun. 2026
React.js, Node.js, MongoDB, Redis, BullMQ, Playwright Live Demo | GitHub

- Engineered an automated scholarship ingestion pipeline using Cheerio and Playwright, with SHA-256 change detection and MongoDB version history to track updates with source evidence.
- Implemented a three-state eligibility engine and BullMQ alerts; reduced search p95 latency by 78% in a local 50-VU k6 benchmark using warm Redis caching.
- Implemented a privacy-first certificate scanner using PDF.js and Tesseract.js, with browser-local text extraction, editable fields, and manual review without uploading documents.

CERTIFICATIONS & ACHIEVEMENTS

- **AWS Certified Cloud Practitioner** – Official AWS Certification demonstrating proficiency in cloud architecture, IAM security, compute (EC2), and storage (S3) services (Score: 827/1000).
- **TCS CodeVita Season 12** – Ranked in the **Top 2% globally** (Global Rank: 10,298 out of 669,000+ registered participants), solving complex algorithmic challenges under timed contest constraints.
- **Competitive Programming** – Solved **400+ problems** in Java across LeetCode, GFG and Codeforces, with demonstrated consistency in Graph Theory, Dynamic Programming, and Tree data structures.

EXTRACURRICULAR ACTIVITIES

Google Developer Groups on Campus (GDG) Nov. 2024 – Jul. 2025
Core Technical Member *Bhopal, India*

- Conducted hands-on web development workshops and collaborated in multi-functional development teams.
